

C4O CITY SOLUTIONS PLATFORM – Terms & Conditions

SUPPORTING CITIES TO ADVANCE CLIMATE ACTION THROUGH PUBLIC-PRIVATE PARTNERSHIPS*

The City Solutions Platform is an open co-creation process. Any company or organisation may register for participation; however, active involvement will be determined by an evaluation process. If chosen to be an active participant in the City Solutions Platform, companies will gain access to city challenge leads, project management and development, as well as tools to establish strong public-private partnerships and innovative solutions for complex city challenges. The terms and conditions for registering to be part of the City Solutions Platform are as follows:

- In joining, the company or organisation agrees to have their basic information made accessible to all parties registered.
- The City Solutions Platform is for co-creation activities to accelerate the development of possible solutions to cities' key climate challenges. The platform is not for outside commercial dialogue that is irrelevant to the city challenges.
- An organisation's participation in the co-creation workshops is not guaranteed. Organisations will be invited to participate at the workshops based on a scoring evaluation framework in which each organisation is equally evaluated through pre-determined criteria.
- There are no guarantees that any of the proposed solutions at the end of the innovation process will be implemented in the city. The solution implementation decision is at the discretion of the participating city (buyer).
- The costs for the activities that take place in the workshops are financed by the City Solutions Platform programme. Any other associated costs for participation in the co-creation workshops, such as travel and accommodation, is to be self-financed by the organisation.
